

Verbal submission on the proposed plan change to the Mackenzie district plan.

My name is Gavin Loxton; I have a bachelor of Agriculture Science Degree. Of relevance to plan change 13, was a paper in completed in Environmental Site Planning. Also completed a paper is in Human Social Science.

I oppose plan change 13 in its entirety. No person, council or otherwise contacted us regarding plan change 13. This is oppressive and deceitful.

Task V's Process

If you have the process correct, the task is easy. You will never win the task by ignoring the process.

This council is task driven. It has failed in the process of plan change 13.

This council has divided the small Mackenzie district, by creating a "Mackenzie basin sub-zone", a real Wild West V's East fight.

The council can easily improve the process of plan change 13.

- A new major is required who is younger and more in tune with the people of the Mackenzie.
- A new planning officer is required who writes less and in non-fiction.
- First, the council needs to employ a social planning consultant, before the landscape assessment.

Complete this process and the task of controlling subdivision and development in the Mackenzie basin will be easily achieved.
