2022-2023	A multitude of weather events occurred during post balance date resulting in widespread damage across the network from the 19 July 2022 and subsequent damage since. These events (3 flood events - July 2022, November 2022, and December 2022) culminated in widespread and recurring damage across various infrastructure. A lot of infrastructure was overwhelmed Emergency Management - Resilience Funding	3,471,133 20,000
2023-2024	A flood event occurred on 24th July 2023 causing damage in different parts of the network. In August 2023, an amount of \$92,819.66 was paid by Mackenzie District Council regarding this event. It is estimated that an additional \$175,000 will be spent to complete repairs. An emergency events claim has been lodged with NZTA following this event. Water Flooding events near Fairlie provided a turbidity problem, but most. Roding. In June 2022, we experienced a significant district wide flooding Roding - Snow events Emergency Management - Resilience Funding	30,926 354,276 20,000

2024-2025	A snow event occurred in July 2024. To date a total of \$151,306 has been spent due to snow clearance and gritting for ice. A request has been made to Council for additional funds.	69,979
	Between 2 to 4 October 2024, the district experienced a significant heavy rain event that caused widespread flooding and damage, particularly on the Albury area. The rain led to surface flooding, scouring of unsealed roads, and several isolated slips. These slips, along with surface water channels, require immediate restoration work to prevent further damage from additional rainfall. Estimated repair costs are \$192,000 and an emergency even claim has been submitted to NZTA for the damage. A second snowfall event occurred over Labour Weekend, from 25 to 27 October, which caused significant disruption across the district. Following a period of heavy rainfall, the temperature dropped, turning the rain into heavy snow, which led to widespread road blockages and transport disruptions. One of the most critical impacts was an avalanche on Glen Lyon Road, which occurred on the morning of 26 October. The avalanche blocked the road completely, cutting off access to several properties including Glen Lyon Station where several families and hunting groups were isolated. In response, contractors worked throughout the long weekend and through the following week to clear the snow and debris. Despite the challenging conditions and the need for extensive	51,950
	Emergency Management - Resilience Funding	20,000
2025-2026	Severe weather events occurred in July and August 2025. To date a total of \$172,172 has been spent due to snow clearance and gritting for ice. Payments to suppliers \$651,000 above LTP Unbudgeted expenditure for emergency reinstatement and emergency works because of winter maintenance and extreme weather events during the year, primarily snow	172,172
	Parks - Severe weather events occurred in July and August 2025.	61,940
	Emergency Management - Resilience Funding	20,000

In the 2026-2027 Annual Plan - Council resolved to set up a fund for unexpected events, providing funding of \$200,000 annual
