**Q9** Do you think that we should be doing more to reduce, reuse and recycle our waste? **Yes,**  
Other (please specify):  
Better options for organic material. Education, regular information in the various newsletters sharing simple information such as waste and recycling options. Incentives for commercial users (e.g builders) to recycle.

---

**Q10** Do you think our vision, goals and objectives cover the work Council needs to do on waste management and minimisation? **Yes,**  
Other (please specify):  
Adding a few more coin operated rubbish and recycling stations is needed. We have lots of tourists in the Mackenzie who need places to dispose of their waste otherwise it gets left on the side of the road. Other parts of NZ (e.g. Marlborough) have these systems in place.

---

**Q11** Do you think that our Action Plan will ensure that we can meet our vision of a future of minimised waste? **Yes,**  
Other (please specify):  
With the addition of the points made in the previous 2 questions. Burying waste on farms needs to be phased out, an acceptable practice when farm waste volumes were small, now unacceptable on intensively farmed properties.

**Q12** Are there any additional comments you would like to make?

Twizel has excellent refuse and recycling services, unfortunately some folk still expect to dump their rubbish for free. Ongoing education and communication is the key to achieving the outcomes outlined. I encourage the Council to follow through with this plan of action.
