Fax:  
Date: 2022-11-21 00:00:00

Customer number (if known):

Contact person:

Contact person Telephone No:

**Submission Details**

The specific provisions of the Proposal my submission control of light in a rural setting relates to are as follows:

I support / oppose these provisions: I oppose in part

The reason(s) for my submission are: There seems to be insufficient control of high intensity light sources in rural zones. These sources can cause distraction nuisances and leak into the night sky

I seek the following decision from the Mackenzie District Council: Amend the change so as to prohibit high intensity light sources in the rural zone.

I do or do not wish to be  
heard in support of my submission: I do

If others make a similar  
submission I would or would  
not be prepared to consider I would  
presenting a joint case with  
them at any hearing:

Additional information for  
this submission:

Modern lighting technology has led to lights being used as a signal device around the use of equipment eg irrigators and one can imagine future remote (unmanned) operations eg haymaking or feeding out. Light should only be used for illumination (in a controlled way) and not for signalling. I am a frequent visitor to the District
