Hearing on Plan Change 22 (Lighting)

Genesis Energy Limited (**Genesis**, submitter 11) has reviewed the Section 42a Report and recommended tracked-changes to the Light chapter. Genesis considers the recommended changes will sufficiently address its submission points.

In particular, Genesis:

- Supports the recommended new rule LIGHT-R4 allowing temporary outdoor lighting for emergency purposes as a permitted activity.
- Support the recommended change to standard LIGHT-S3 to increase the colour temperature of outdoor lighting from 2,500K to 3,000K.
- Supports recommended new definition for skylight which confirms it is a window set in a roof or ceiling.

If the Hearing Panel would like further information, please contact Alice Lin (Environmental Policy and Planning Advisor) by email Alice.Lin@genesisenergy.co.nz or phone 02102211943.

Nakū noa, nā

A handwritten signature in blue ink that reads "Karen Sky".
